

BluePex® CYBERSECURITY

THIAGO MARTINS OLIVEIRA

BluePex® Cybersecurity Inc. awards this certificate for achieving 100% completion of the course:

BluePex® Certified Cybersecurity Framework Professional

Professionals who have earned this certification have successfully completed an intensive strategic specialization journey, demonstrating mastery of the nine essential pillars of the BluePex® Cybersecurity Framework. They possess proven competence in implementing IT management with 360° visibility, orchestrating rigorous controls for Software and Hardware Inventory, Update Management, and Access and Credential Control.

They are qualified to protect infrastructure through advanced Firewall/UTM configuration, Antivirus (EDR), and Email Security, as well as ensuring business continuity through robust Backup policies. Additionally, these professionals are prepared to manage Tickets and Incidents and lead People Management, promoting a security culture. They possess the necessary knowledge to align the organization with global and national standards (ISO, NIST, LGPD), proactively identifying and mitigating risks to raise the maturity of corporate cybersecurity.

Course dates: October 2025 to February 2026
Duration: 9 hours
